

ABOUT INFORMS

The Institute for Operations Research and the Management Sciences (INFORMS®) is an international scientific society with over 10,000 members dedicated to applying scientific methods to improve decision making, management, and operations. Operations research (O.R.) is the discipline of applying advanced analytical methods to help make better decisions. Members of INFORMS work in business, government, and academia and represent fields as diverse as aviation, health care, law enforcement, the military, finance, marketing, and telecommunications.

INFORMS serves the scientific and professional needs of O.R. analysts, consultants, scientists, students, educators, and managers, as well as their institutions, by publishing a variety of journals that describe the latest research in O.R.
