"OPERATIONS RESEARCH AT BELL LABORATORIES THROUGH THE 1970s,"
by DAWSON, McCALLUM, MURPHY, and WOLMAN

Part I - March-April 2000

ABSTRACT

1. ORGANIZATIONAL HISTORY
    - 1.1 Origins of Operations Research
    - 1.2 Early Uses of Quantitative Methods
    - 1.3 Recognition of Operations Research
    - 1.4 Establishment of Business Operations Analysis in the Bell System
    - 1.5 Operations Research at Bell Labs
    - 1.6 Evolution of the Operations Research Center within Bell Labs

2. APPLICATION OF OPERATIONS RESEARCH TO BELL SYSTEM PROBLEMS
    - 2.1 Teletraffic Theory and Engineering
        - 2.1.1 Traffic Variability
        - 2.1.2 Network Management
        - 2.1.3 Research on Congestion Systems
        - 2.1.4 Traffic Network Design
        - 2.1.5 Leadership of Traffic Work

Part II - May-June 2000

    - 2.2 Capacity Expansion in Telephone Networks
    - 2.3 Operations Analysis
        - 2.3.1 Coin Collection
        - 2.3.2 Inventory Management for Station Products
        - 2.3.3 Directory Marketing Analysis
        - 2.3.4 Workforce Scheduling
        - 2.3.5 Other Activities and Supporting Research

Part III - July-August 2000

2.4 Applied Statistics
- 2.4.1 Forecasting
- 2.4.2 Measurement and Index Construction
- 2.4.3 Sample Surveys for Engineering and Cost Analysis
- 2.4.4 Engineering Design and Human Factors
- 2.4.5 Human Resources Management
- 2.4.6 Software for Special and General Applications
- 2.4.7 Applied Research in Statistics

2.5 Related Operations Research Activities
- 2.5.1 Data Management for Operations
- 2.5.2 Economics Modeling
- 2.5.3 Examples of Analytical Support and Corporate Planning in AT&T

3. SUMMARY
