

STRATEGY SCIENCE

Daniel A. Levinthal,
Wharton School of the University of Pennsylvania, Editor-in-Chief

INFORMS is pleased to announce the introduction of our 14th journal, *Strategy Science*. The first issue is scheduled to be published in 2016.

Strategy Science is a quarterly journal that seeks to publish outstanding research directed to the challenges of strategic management in both business and nonbusiness organizations. This agenda encompasses a broad range of topics including relatively macro-level concerns of industry dynamics and the institutional context in which organizations operate to more organizational-level focused work, such as processes of organizational change, and important work that links the organization to its external context, such as questions of firm boundaries and strategic positioning.

The journal is eclectic with respect to methodologies, including field-based work, large-sample empirical work, and computational and analytic models. *Strategy Science* is open to a wide variety of underlying disciplinary approaches including economics, operations research, political science, psychology, and sociology. The critical issue with respect to publication is whether the work enhances, in some meaningful manner, our understanding of some substantive issues in the strategy domain.

Frequency: 4 issues/year (quarterly)

ISSN: 2333-2050 (print)

eISSN: 2333-2077 (online)
